**Tests:** Jest, Storybook, Cypress, Mocha, Chai

----------------------------------------------------------------------------------------------------

## PROJECTS

### Herbiview  April 2022  🌐 (live demo)

- An app that allows an individual to upload an image of plant and retrieve information about it including health assessment and toxicity towards cats, dogs and horses.
- Create an account and keep track of the plants you look up or peruse the database
- **Tech-stack:** React, Express, PostgreSQL, NodeJS

### Scheduler  April 2022  🌐 (live demo)

- Scheduling app built with React that allows users to book, modify or cancel interview appointments
- Tested with Storybook, Jest, Cypress and CircleC
- **Tech-stack:** React, JavaScript, PostgreSQL, NodeJS

### Kool-Kids Snax  March 2022  🌐 (customer demo)  🌐 (vendor demo)

- An app that uses the Twilio API to notify the vendor via SMS that an order has been placed when a customer places an order. The customer is notified via SMS when the restaurant updates the order as well as when the order is ready to be picked up.
- Designed and built the front-end of the application using HTML/CSS/SASS, EJS, JS
- **Tech-stack:** JavaScript, EJS, Express, NodeJS, PostgreSQL

----------------------------------------------------------------------------------------------------

## WORK EXPERIENCE

### Building Systems Security Analyst • University of Alberta

March 2021 - February 2022

- Analyze existing business systems and identify areas of opportunity for improvement in scalability
- Engage with stakeholders, developers and business users to identify and determine business requirements, and provide recommendations
- Create proposals and documentation outlining business requirements, steps of implementation, and project planning

### Business Systems Analyst • Red Deer Ironworks

June 2017 - March 2021

- Organized and delivered Epicor ERP data migration and system maintenance.
- Diagnose and troubleshoot technical issues and bugs relating to the ERP system.
- Communicate with business users to understand their needs to make the necessary technical enhancements to the ERP to improve business efficiency.
- Develop and improve functional management reports using Crystal Reports and Microsoft SSRS.
- Utilize MySQL and program in C# to improve front-end data capture processes within the ERP to aid in accounting, sales and production transactions.
- Write SQL queries to capture, manipulate and produce data reports and sets as requested by users

----------------------------------------------------------------------------------------------------
